

Frame Their Learning Virtual Training
June 16, 2022 12:30-1:30

Deadline to register is June 14th

Frame Their Learning is a highly visual “pocket chart program” that’s easy to use and directly correlated to all CLASS® domains and behavioral markers, but specifically designed to provide additional guidance in the **Instructional Support domain**.

Many of you were not available to take the face-to-face training offered in May. We are offering this 1-hour overview of “Frame Their Learning” as a lunch time virtual training. We urge at least one of your teachers or yourself as a director, to attend this webinar to help boost your knowledge of Instructional Support within the CLASS Observation. This upcoming year all schools that do VPK will be assessed and typically schools are not scoring well in the CLASS domain known as Instructional Support. Take advantage of this great tool and be better prepared.

This training is limited to 30 participants so please register asap.
