Preparing Young Children for School

- REL Southeast recently shared a resource in What Works Clearinghouse -
 - <https://ies.ed.gov/ncee/wwc/PracticeGuide/30>
- Practice guide combines research to create seven recommendations to increase school readiness
- 5 of the 7 have strong evidence correlated to student literacy achievement and helping prepare young children to benefit from the learning opportunities they will encounter in school

Live the vision. Achieve the mission.

<p>1 Regularly provide intentional, engaging instruction and practice focused on social-emotional skills.</p> <p>▼ Show More</p>	 STRONG EVIDENCE	
<p>2 Strengthen children's executive function skills using specific games and activities.</p> <p>▼ Show More</p>	 MODERATE EVIDENCE	
<p>3 Provide intentional instruction to build children's understanding of mathematical ideas and skills.</p> <p>▼ Show More</p>	 STRONG EVIDENCE	
<p>4 Engage children in conversations about mathematical ideas and support them in using mathematical language.</p> <p>▼ Show More</p>	 MODERATE EVIDENCE	
<p>5 Intentionally plan activities to build children's vocabulary and language.</p> <p>▼ Show More</p>	 STRONG EVIDENCE	
<p>6 Build children's knowledge of letters and sounds.</p> <p>▼ Show More</p>	 STRONG EVIDENCE	
<p>7 Use shared book reading to develop children's language, knowledge of print features, and knowledge of the world.</p> <p>▼ Show More</p>	 STRONG EVIDENCE	

Recommendations by Effect Size

1. Intentionally build understanding of math ideas and skills
2. Tied - Intentionally build vocab and language; build knowledge of letters and sounds
3. Conversations about math and support to use mathematical language
4. Use shared reading to develop language, print features, and understanding of the world
5. Instruction on SEL
6. Use games to improve Executive Functioning skills

Effectiveness of Early Literacy Instruction

Includes an information on 20 years of research in teaching language and literacy.

EDUCATE **ALL** STUDENTS FOR **SUCCESS**

Martin County School District

Domains Reviewed in the Study

Important Early Literacy Domains:

- Language
 - Vocabulary, Listening Comprehension, Syntax, Narrative Understanding and Production, Composite Language
- Phonological awareness
 - Awareness of larger spoken units like syllables and rhyming words
- Print knowledge
 - Letter Knowledge, Concepts About Print (directionality, differences between letters and words, upper and lower case, punctuation)
- Decoding
 - There is a predictable relationship between phonemes and graphemes
- Early writing
 - Letter Writing, Name Writing, Spelling, Written Expression

https://ies.ed.gov/ncee/rel/regions/southeast/pdf/What_does_20_years_of_research_say_about_teaching_language_and_literacy_in_preschool.pdf

What does 20 years of research say about teaching language and literacy in preschool?

The REL Southeast research team summarized 20 years of research to identify instructional practices that best support the language and literacy development of preschool students. The systematic review included 109 rigorous studies that evaluated 132 language and literacy interventions. The review reported the overall impacts on students' language and literacy performance before entering kindergarten.

How should schools or districts decide which instructional materials and strategies to use?

When making decisions, it is important to match the instructional objectives with student needs. In addition, determining required resources is fundamental for successful implementation.

Details about each intervention and how each was implemented in different settings can be found in the systematic review report. [Click on the report cover or here for more information.](#)

Click on the circles below to learn more about each instructional area.

Live the vision. Achieve the mission.

What are the Implications?

Teachers should:

- Read stories and provide opportunities for students to find the main idea, connect to their lives, draw inferences beyond the text, make predictions, recall or retell the story
- Introduce new vocabulary
- Use small groups to intervene with language
- Move away from programs that solely teach language and replace with practices like interactive book reading
- Model, extend, recast, ask open ended questions, or play interactive games to support expressive language development

What are the Implications?

Teachers should support phonological awareness by:

- Using an intervention that includes a combination of exercises like identification, matching, blending, counting, segmentation, or production
- Asking students to identify initial or terminal phonemes

Teachers should support print knowledge by:

- Teaching letter names and sounds
- Directing students' attention to print by explicitly commenting on, asking questions about, pointing to, and tracking text being read

What are the Implications?

Teachers should support decoding by:

- Devoting most of their attention on phonological awareness and print knowledge instruction to lead to improved decoding skills
- Emphasizing the relation between individual sounds in spoken language and the letter we use to represent them in written language

Teachers should support writing by:

- Having students write taught letters and words
- Inviting students to write their name

STUDY HIGHLIGHTS

Effectiveness of Early Literacy Instruction: Summary of 20 Years of Research

Children entering kindergarten vary greatly in their language and literacy skills. Therefore, up-to-date information about evidence-based practices is essential for early childhood educators as they support preschool children's language and literacy development. To address this issue, the Regional Educational Laboratory Southeast conducted a systematic review covering research from 1997 to 2017 using a review process modeled after the What Works Clearinghouse (WWC) methodology. The systematic review identified rigorous evidence on the effectiveness of early childhood curricula, lesson packages, instructional practices, and technology programs that aim to improve

students' performance in **language, phonological awareness, print knowledge, decoding, and early writing**. Please go to the glossary section for more information of terms in bold.

This fact sheet draws on the systematic review and explains the methodology and key findings for early childhood educators and policy makers. [Click here to view the report and related files.](#)

Eight Steps of Systematic Review

1. Establish review protocol

The review protocol includes the focus of the review, key definitions, eligibility criteria, and the process of literature review, screening, and full-text review.

2. Literature search using keywords

The research team identified **74,001** related studies using a comprehensive list of keywords.

3. Sift and select eligible studies

After removing irrelevant and duplicate studies, **357** studies were identified to meet eligibility according to the review protocol.

4. Assess the quality of eligible studies

The research team used a review process modeled after the What Works Clearinghouse (WWC) methodology to assess the quality and strength of eligible studies. Based on the review process, **109** studies were determined to be high-quality experimental, quasi-experimental, or single case design studies.

5. Extract data from high-quality studies

Within the 109 studies, **132** interventions were evaluated. The implementation characteristics (for example, group size) and instructional features of each intervention were coded to summarize the similarities and
